superfluidity
April 18th, 2020 - superfluidity
was originally discovered in
liquid helium by pyotr kapitsa
and john f allen it has since been
described through
phenomenology and microscopic
theories in liquid helium 4 the

superfluidity occurs at far higher temperatures than it does in helium 3 each atom of helium 4 is a boson particle by virtue of its integer spin a helium 3 atom is a fermion particle it can form bosons'
