'Anatomy Shoulder and Upper Limb Shoulder StatPearls

April 14th, 2020 - The shoulder is structurally and functionally complex as it is one of the most freely moveable areas in the human body due to the articulation at the glenohumeral joint. It contains the shoulder girdle which connects the upper limb to the axial skeleton via the sternoclavicular joint. The high range of motion of the shoulder is at the expense of decreased stability of the joint and it is'
