### ***Aloe vera for treating acute and chronic wounds Cochrane***

*December 23rd, 2019 - In people with chronic wounds one trial found no statistically significant difference in pressure ulcer healing with Aloe vera RR 0.10 95 CI 1.59 to 1.79 and in a trial of surgical wounds healing by secondary intention Aloe vera significantly delayed healing mean difference 30 days 95 CI 7.59 to 52.41'*

### **'Chronic Wounds RedDress**

**December 24th, 2019 - Pressure ulcers are caused by ischemia that occurs when pressure on the tissue is greater than the pressure in capillaries restricting blood flow into the area Muscle tissue which needs more oxygen and nutrients than skin does shows the worst effects from prolonged pressure As in other chronic ulcers reperfusion injury damages tissue'**

### **'Negative pressure wound therapy for treating leg ulcers**

December 7th, 2019 - Negative pressure wound therapy NPWT is a treatment option for pressure ulcers a clear current overview of the evidence is required to facilitate decision making regarding its use Objectives To assess the effects of negative pressure wound therapy for treating pressure ulcers in any care setting'

### **'NON HEALING WOUNDS**

*December 25th, 2019 - defines chronicity a range of 4 weeks to 3 months has been used to define chronic wounds in the literature The Wound Healing Society classifies chronic wounds into 4 major categories pressure ulcers diabetic foot ulcers venous ulcers and arterial insufficiency ulcers Each of these types of wounds and others will be*

discussed in this'

---

### 'Healyx Changes Lives by Treating Chronic Wounds ? Fogarty

**December 22nd, 2019 - Healyx Changes Lives by Treating Chronic Wounds That was just one of the successful stories of the study which also included a variety of challenging wounds from chronic sacral pressure ulcers to electrical burn injuries The pilot study highlighted Kyron?s safety'**

### 'Review Treating Chronic Ulcers with WoundSource

December 26th, 2019 - Cadexomer with iodine has been shown to reduce bacterial load in wounds while absorbing fluid exudate removing pus facilitating de sloughing and maintaining a moist environment In a study comparing two cadexomer iodine preparations with each other and with standard care in a group of patients with chronic ulcers the cadexomer iodine'

### 'Wounds and ulcers Ulcer dressings and management

December 26th, 2019 - wounds need to be treated systemically as well as topically 1 12 Pressure ulcers Pressure ulcers Figure 4 are the most preventable of all of the chronic wounds Patients who are bedridden for example as a result of stroke spinal injury multiple sclerosis or dementia often develop extensive pressure ulcers'

### 'Pressure Ulcers BHTA

**December 15th, 2019 - The cost to the NHS of treating chronic wounds associated with Pressure Ulcers exceeds £2 6 billion per annum 1 Each Pressure Ulcer PU causes pain and discomfort and risks exacerbating co morbidities Pressure Ulcers were reported to have caused more than 200 deaths and contributed to 25 000 more deaths in England and Wales in 2010'**

### 'PRESSURE ULCERS AND WOUND CARE CECity

**December 26th, 2019 - PRESSURE ULCERS 1 OF 2 ? All chronic wounds are contaminated or colonized with bacteria but may not be infected ? Infectious complications Cellulitis abscess osteomyelitis pyarthrosis necrotizing fasciitis systemic infectious ? Signs and symptoms of infection Fever increased drainage pain warmth"Chronic wounds advanced wound dressings and antimicrobial**

**December 26th, 2019 - antimicrobial dressings for managing common chronic wounds diabetic foot ulcers pressure ulcers venous leg ulcers and infected wounds It includes evidence and recommendations from national guidance if available and the most up to date systematic reviews and meta analyses search date July 2015'**

### 'Skin Substitutes for Treating Chronic Wounds Effective

December 26th, 2019 - Chronic wounds have failed to pass through the normal healing process in an orderly and timely manner and often remain in the inflammation phase Patients with chronic wounds are burdened with loss of function wound recurrence and significant morbidity Chronic wounds include pressure ulcers diabetic foot ulcers and venous leg ulcers'

### 'Avoiding errors in treating chronic wounds Clinical Advisor

October 10th, 2019 - The three major types of chronic wounds are diabetic venous and pressure decubiti In treating any chronic wound one of the most common errors is to concentrate solely on the wound start an oral antibiotic and or apply antibiotic creams and expect rapid healing"**Bed Sores Decubitus Ulcers Causes and Treatments**

July 1st, 2019 - A decubitus ulcer is also known as a pressure ulcer pressure sore or bedsore but chronic deep ulcers can be difficult to treat specialists and nurses experienced in treating pressure sores The team may evaluate your ulcer based on several things These include the size and depth of your ulcer"**Chronic Wounds**

---

## **WoundCareCenters.org**

December 25th, 2019 - An important aspect in caring for wounds is to remove the causing agent as in cases of wounds caused by weight bearing or wounds that are under constant pressure. When wounds do not get relief from constant pressure, there can be a cumulative breakdown of the tissue. *Types of Chronic Wounds*

### **'Skin Substitutes for Treating Chronic Wounds**

December 27th, 2019 - Key Question 2 For patients with chronic wounds, pressure ulcers, diabetic foot ulcers, venous leg ulcers, or arterial leg ulcers, are skin substitutes more effective than other wound care options: usual care, standard care, synthetic dressings, growth factors, skin grafts, or other treatments used as a comparison in promoting wound healing for?

### **'Research Protocol: Skin Substitutes for Treating Chronic**

December 22nd, 2019 - Chronic wounds have failed to pass through the normal healing process in an orderly and timely manner and often remain in the inflammation phase. Patients with chronic wounds are burdened with loss of function, wound recurrence, and significant morbidity. Chronic wounds include pressure ulcers, diabetic foot ulcers, and venous leg ulcers.

### **'Interventions for pressure ulcers: a summary of evidence**

January 24th, 2018 - A systematic review of autologous platelet-rich plasma for treating chronic wounds included 10 trials, 442 participants. The Cochrane review concluded that it was unclear whether platelet-rich plasma influences the healing of chronic wounds other than foot ulcers associated with diabetes.

### **'Challenges in the Treatment of Chronic Wounds: Advances**

December 25th, 2019 - Significance: Chronic wounds include but are not limited to diabetic foot ulcers, venous leg ulcers, and pressure ulcers. They are a challenge to wound care professionals and consume a great deal of healthcare resources around the globe. "Bed sores: Treatment, stages, and prevention"

December 21st, 2017 - Treating pressure ulcers is not easy. An open wound is unlikely to heal rapidly. Even when healing does take place, it may be inconsistent because of the damage to skin and other tissues. Less severe pressure ulcers often heal within a few weeks with proper treatment, but serious wounds may need surgery.

### **'Types of Chronic Wounds and Risk Factors: Learn about their**

December 17th, 2019 - Most chronic wounds appear on the lower extremities but may appear elsewhere as well, such as on the buttocks. Four of the most common types of chronic wounds our patients have are diabetic, venous, arterial, and pressure ulcers, with 98% of all lower extremity wounds being diabetic or venous in nature.

### **'REVIEW ARTICLE: Optimal use of negative pressure wound**

November 26th, 2019 - In treating pressure ulcers, Subhas Gupta, Shigeru Ichioka, Gupta S, Ichioka S. Optimal use of negative pressure wound therapy in treating pressure ulcers. Similar to other chronic wounds, PRUs take longer time to heal than acute wounds. There is a growing support for the concept that chronic wounds stall in the inflammatory phase of.

### **'Wound healing and treating wounds: Chronic wound care and**

December 20th, 2019 - Wound healing and treating wounds. Chronic wound care and management: diabetic ulcers and chronic vascular wounds. 62 causing pain with dressing changes. 85-100 Frequent repositioning every 2 hours is one of the core elements of treating and preventing pressure ulcers. 86-98-99 "Healing chronic wounds." The BMJ

January 18th, 2002 - New physical, pharmacological, biological, and surgical treatments offer the possibility of tailor-made therapy. Chronic wounds represent a
